Quarterly Bulletin on Employment and Unemployment Indicators

1. Introduction

1.1 Periodic Labour Force Survey (PLFS) of NSO

1.1.1 Considering the importance of availability of labour force data at more frequent time intervals, National Statistical Office (NSO) launched Periodic Labour Force Survey (PLFS) on April 2017. On the basis of PLFS, a Quarterly Bulletin is brought out giving estimates of labour force indicators, viz., Worker population ratio (WPR), Labour Force Participation Rate (LFPR), Unemployment Rate (UR), distribution of workers by broad status in employment and industry of work in the Current Weekly Status (CWS).

Seven Quarterly Bulletins of PLFS corresponding to the quarters ending December 2018, March 2019, June 2019, September 2019, December 2019, March 2020 and June 2020 have already been released. This Bulletin for the quarter ending September 2020 is the eighth in the series.

Besides the Quarterly Bulletin, an Annual report on the basis of PLFS covering both rural and urban areas giving estimates of all important parameters of employment and unemployment in both usual status (ps+ss) and current weekly status (CWS) is also released. The first Annual Report (July 2017 - June 2018), second Annual Report (July 2018 - June 2019) and third Annual Report¹ (July 2019 - June 2020) of PLFS have already been released.

1.2 Indicators presented in this Bulletin

1.2.1 In this Bulletin indicators of employment and unemployment in current weekly status (CWS) are presented for the urban areas separately for the periods:

- July – September 2019
- October – December 2019
- January – March 2020
- April – June 2020
- July – September 2020

¹ The 'Concepts and Definitions', 'Sample Design and Estimation Procedure' and Schedule on PLFS (Schedule 10.4) (first visit and revisit) may be perused as Chapter Two, Appendix B and Appendix C, respectively in the Annual Report, PLFS: 2019-20, which is accessible at www.mospi.gov.in.

2. Key findings

2.1 Labour Force Participation Rates (LFPR) in current weekly status

2.1.1 Labour force refers to the part of the population which supplies or offers to supply labour for pursuing economic activities for the production of goods and services and therefore, includes both 'employed' and 'unemployed' persons. Labour Force Participation Rate (LFPR) is defined as the percentage of population in the labour force. Labour force according to *current weekly status* (CWS) is the number of persons either employed or unemployed on an average in a week of 7 days preceding the date of survey. In Statement 1, LFPR in CWS are presented.

2.2 Worker Population Ratio (WPR) in current weekly status

2.2.1 Worker Population Ratio (WPR) is defined as the percentage of workers in the population. The workforce measured in CWS gives the average picture of the workforce in a short period of one week during the survey period. The estimate of workforce in the CWS provides the number of persons worked for at least 1 hour on any day during the 7 days preceding the date of survey. In Statement 2, WPR in current weekly status are presented.

2.3 Distribution of workers in current weekly status by broad status in employment

2.3.1 The workers in current weekly status are classified into three broad categories according to their status in employment. These broad categories are: (i) *self-employed*, (ii) *regular wage/salaried employee* and (iii) *casual labour*. Within the category of *self-employed* two sub-categories have been made as follows: (i) *own account worker and employer* combined together and (ii) *unpaid helper in household enterprises*. In Statement 3, distribution of the workers of age 15 years and above in CWS by status in employment are presented. It may be noted that self-employed persons who did not work either due to sickness or due to other reasons though they had self-employment work are included in column 4 of this Statement. Thus, the estimates given in column 4 may be higher than the sum of the estimates in column 2 and column 3.

2.4 Distribution of workers in current weekly status by broad industry of work

2.4.1 Three broad industries of work which have been considered here are agriculture sector (NIC-2008 codes 01-03), secondary sector (NIC-2008 codes 05-43) and tertiary sector (NIC-2008 codes 45-99). Distribution of workers of age 15 years and above in CWS, in these three broad industries of work are in Statement 4.

2.5 Unemployment Rate (UR) in current weekly status

2.5.1 *Unemployment rate* (UR) is defined as the percentage of unemployed persons in the *labour force*. The estimates of unemployed in CWS give an average picture of unemployment in a short period of 7 days during the survey period. According to the *current weekly status* (CWS) approach, a person was considered as unemployed in a week if he/she did not work even for 1 hour on any day during the reference week but sought or was available for work at least for 1 hour on any day during the reference week. In Statement 5, UR in CWS for the periods are presented.

3. Sample Size

3.1 Sample Size in urban areas in each of the survey period July- September 2019, October – December 2019, January – March 2020, April – June 2020 and July – September 2020: In urban areas, a rotational panel sampling design was used and in this rotational panel scheme each selected household in urban areas is visited four times – one with first visit schedule and other three with revisit schedule. In the Table below, the sample size in terms of FSUs (UFS blocks), households and persons in urban areas is given, separately for each of the survey period July – September 2019, October – December 2019, January – March 2020, April –June 2020 and July – September 2020. It may be noted that in each of these periods, besides the first visit sample (25 per cent of total sample size), samples in respect to three revisits (75 per cent of total sample size) were also surveyed.

Table : Sample size in urban areas in each of the Survey period July-September 2019 ,October-December, 2019, January – March, 2020, April – June 2020 and July- September 2020

3.2 Considering low sample sizes for giving estimates at different disaggregation levels, the tables are presented in respect of Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir (including Ladakh UT), Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Telangana, Uttarakhand, Uttar Pradesh, West Bengal and Delhi.

4. PLFS fieldwork during COVID-19 pandemic:

The fieldwork of PLFS was suspended from 18.03.2020 due to COVID-19 pandemic. The fieldwork of the pending FSUs for January - March 2020 and the field work of FSUs allotted for canvassing during April – June, 2020 were resumed on 1st June 2020. Although schedules were canvassed later, the information was asked with respect to the actual reference period which would have been adopted if there were no pandemic. Thus, there was no break in the flow of information collected for any quarter except that informants were approached at a later date due to the unavoidable situation. The field work for July-September, 2020 was undertaken along with canvassing the pending schedules of previous quarter, i.e., April-June, 2020.

Since the resumption of fieldwork in June 2020, the canvassing of revisit schedules is being undertaken in telephonic mode, as per actual reference periods of samples, in the original paper revisit schedules. The telephonic mode was adopted in order to minimize the physical interaction with informants so as to contain spread of COVID virus and to cope up with pandemic related restrictions. For about 78.8% of the revisit Schedules for the period July – September, 2020, information was collected over the telephone. These aspects may be kept in mind while using the estimates of PLFS for the concerned quarters.
